

# Glucosamin Formula

Collagen protein – colostrum – vitamin E

## Product description

Every joint is covered with a cartilage layer and a real lubrication liquid. This liquid, produced by the joint capsules, allows a smooth and painless glide of the joint bones and nourishes the cartilage, which is the shock absorber of the joint.

Chondroitin, glucosamine as well as hyaluronic acid are important substances for the constitution and the preservation of the tissue structures of the movement apparatus. Bones, cartilages as well as the synovial liquid depend on the supply of these nutrients. In case the body cannot produce enough of these substances, the synovial liquid becomes thinner and more watery. The joints thereby are conditioned by the absence of lubricant and become more susceptible to wear. The body ordinarily produces sufficient amounts of these substances. Nevertheless while the age is increasing, the glucosamine production is decreasing. As a consequence, the joints dry up and become more susceptible to overloading.

As these substances are to be found mainly in side products of the meat industry, a specific supply of the substances chondroitin, glucosamine and hyaluronic acid is very difficult to obtain in the daily diet. Special gelatine rich in these nutrients and made out of collagen phosphate can compensate the lack of these substances and optimise the cartilage and osseous metabolisms.

High quality milk proteins and bovines colostrum, the first milk of cows, promote the preservation of the cartilage and promote the production of the synovial liquid.

## Advantages

- Special gelatine out of collagen hydrolysates with the active substances chondroitin, glucosamine, hyaluronic acid
- Growth factors thanks to an enrichment with colostrum
- 750 mg glucosamine per daily ration
- Scientifically supported efficiency

## Utilisation

Appropriate as food complement in case of unspecific pain in the joints. Especially appropriate for sportsmen who have to endure high physical charges.

**Intake recommendations :** 4-6 tablets daily

# Glucosamin Formula

Collagen protein – colostrum – vitamin E

## Ingredients

Collagen protein hydrolysates 63% (pork, chicken), glucosamine sulfate 2KCl from crustaceans origin, bovine colostrum 6%, release agents (silicic acid, talc), firming agent E 1201, glazing agent (shellac resin, E 171, gum arabic), natural vitamin E, spice extract, brown algae.

## Packaging / nutrition facts

Box of 180 tablets

nutrition facts	per 100 g		per 6 tablets = 1 daily ration
