

Protector Tabs

Tablets for the cells protection and the regeneration

Product description

Intensive sport activities, as well as stress, ozone, UV-rays and smoking generate free radicals in the body. These materials damage the cells and weaken the immune system. The vitamin A (beta-carotene), C, E and selenium as antioxidants can stop these attacks. In the nature, these materials are found in various forms and in combination and act synergistically (e.g. carotenoids, tocopherols, tocotrienols, lutein and bioflavonoids). PROTECTOR TABS provide the body with these antioxidants.

The antioxidative effect of the traditional radical catchers is supported by secondary plant components out of blueberries, bioflavonoids, special betaglucans from the yeast, the taurine as well as the piperine (black pepper extract). Besides, outdoor sportspeople profit from the protecting effect of the lutein, which defends efficiently skin and eyes from the aggressive UV-rays.

Thermolysed yeast and yeast extract deliver nucleotides and RNA, which are the primary elements of the cell synthesis. During hard trainings, infections or injuries, large amounts of nucleotides are needed in a short period of time in order to allow the reproduction of the body cells.

Consequently PROTECTOR TABS strengthens the immune system and accelerates the recovery.

Advantages

- Antioxidative composition scientifically highly efficient
- A daily ration corresponds to 2.5 servings of fresh fruits and vegetables, with a protective capacity of 1300 ORAC (Oxygen Radical Absorbance Capacity)
- Raised protection by various combined effects
- Magnesium and trace elements support the regeneration
- Nucleotide for a better immune system and an accelerated regeneration (check also our product NUCLEO CELL)
- Practical tablets

Utilisation

By intensive physical activities, stress or exposure to harmful environmental conditions (ozone, smoking, smog, UV light, etc...).

Ingredients

Minerals (magnesium lactate, potassium citrate, zinc gluconate, selenium yeast, manganese and copper gluconate, sodium molybdate, chromium chloride, potassium iodide), taurine, vitamins (ascorbic acid, natural carotenoids [α -, β -, γ -carotene, lutein, lycopene], natural d- α -tocopheryl acetate, palm oil with d- α -, γ -, δ -tocotrienol, nicotinamide, retinyl acetate, calcium pantothenate, cholecalciferol, pyridoxine hydrochloride, riboflavin, cyanocobalamin, thiamine mononitrate, folic acid, biotine), nucleotides, black berries extract, yeast extract with betaglu-

Protector Tabs

Tablets for the cells protection and the regeneration

cans, citrus bioflavonoids, bulking agents (cellulose, talcum, silicic acid) glazing agent (shellac), acacia gum, lutein, black pepper extract.
